H WPESIDENT AND PARTIES

In the Eastern press there is much criticism of Speaker Carliele's work in maxing up the committees. Fault is found chadly with the committees of ways and means and on colange. Both committees, I is asserted, will "obstruct necessary reforms." This means that the ways and means committee will not be ab a to agree on any practical fariff leys lation, and that the committee on comage with not recommend suspension of the manufacture of the siver dollar. It is no wever, as yet un certain whether the communities, which consists of thirteen measters, will be found to tand seven to six, or six to seven, on the si ver question. This committee is composed of eight democrats and five republicans. Four depo crats are strongly committed to the policy of ontinuing and increming the comage of the alver deliar two repulsions have declared the question,—though his course hitherto has been such as to lend place till y to the claim of silver men that he will be found on heir side

But the course of the co mage committee will not now be of much importance, since it is quite certain that the comage of siver will not be suspended by the present congress, no matter what recommendat a that committee may free trade and to gold policy global

predictions are being made as to the outlood for the democratic party. The New York H. M. 7.4, special argan of the administration is quite depressed by the prospect. It complains that Speaker Carliste, in making up the committee, "tried to trim on vitally important ques tions." but the committees seem to be so framed as to promise but little useful legislation." that it is to be a go-as you please pon gress, evcept in so far as republicans may con and finally that "nex! full alnew house will be chosen, and from present appearances it

will have a bandsome republican majority!
This last intimation nowever, is not very likely to be resized. With the Solid South at its back the democratic party is protty sure to pick up members enough in porthern states to enable i to hold the house o representatives It is true, no doubt, that President thereiand s administration is not in harmony with the wish es of the larger ; tion of his party (an al questions of the preent time he is more nearly in accord with the in self republicans than with the lody of democrate A great many democrates Lee hat the republicans subsaintially site stilling were less not so much that tially see still up wer. But not so much that they realize the continue ascendancy and do ni nation in the government of the policy and ideas of the republican party. As, J. W. Bookwa ter, a prominent democrate of Olio, recently said. Non-men of the republican party are still in power. Your ileus, or the reflection of them, dominate President Cleryland. He apparent whis much more re-Cleveland He apparent y has much more respect for your policy and your ileas than for those of the party that elected him "

In other circumstances the tourse of the pres ident in ght be expected to lead to dissolution of his party. But the strength of his party in the South is a sure projection to it against that consequence. The South is democratic proon history and tredition, and will stand by the party in any event, while confirmity on the part of the president to republicat ideas will go far to ward weakening the feeling of intense of pos-tion to he democratic, party so long entertained by northern republicans. When democrats say they see no real (first enco between the peach administration and is republican predeciseous they combit utenote is the to the republicant of a large class of republicane to an administration that is dem ocratic only in name, and even that point may

HILL ILANGE COMPLETE III

There is now a statement that the liven h government is about to quartotee a I an for the con pletion of the Parama canal. The Puris correspondent to the Louton Times writes it is the government is about to send M Ito issue "a trustworthy engineer, to report upon de condition and p spects of the great undertak ing. THE LEGITIMATE CLEARANCE Is this. It is customary, at the end of each season, or twice a year, to reduce stock before receiving new goods for the coming season. Our way of making a clearance is this: We throw out no baits, but our low prices for first-class goods, made to order for this northwest trade ard guaranteed to be the Lutest Eastern Styles, is sufficient to let the public know that our prices have been reduced to clear out stock on hand. You will find EVERY ARTA(LE in the cutire store marked down

The dismocratic members of the court paid on attent on to the suggestion, that it might be well to appoint two republicans in precincts where the republicans have large materials.

came in precincts where the republicans have large majorities.

Last Saturday, while Willie, youngest son of Mr. and Mis. teorge P atman, and only about is years old was playing in the pattern depart ment of the Roseburg honworks, and while snatching small blocks firm the platform of a circular bandsaw, which was then in use, had the ends of the fingers of his lest hand sawed off up to the first joint. The luttle fellow hardly knew that he was hard until the looked at his hand and saw the ups of his fingers ly ag on the platform. In Bane 5, who was present, dressed the indured new the solid be expected.

Last Sunday after he riters, and the like fellow is doing as well as could be expected. Last Sunday after the departs sheriff had at lowed the prisoners to copie out of their cells into the cornidor, after having particken of their breakfast and being left to their selves in the highest they set about to overt some is home for a escape. They is aniced to find an old intinet which had been used to spirk kindling wood, and having contrived in some manner to note the bare of the wantilator in the rear of the various fithe wantilator in the rear of the share of the wantilator in the rear of the size of the vapitalator in the rear of the appearance, and seeing only two of his princes. when loghing up time came and then make good his escape, but fortunately he had no properly measured the cireful conduct of the sheriff

at the council chambe at Portland, for what, special purpose was not stated, but, presumtably, to consider the fruit-growers' interest. Though the call was general, the shortness of the time practically ruled out all fruit-growers in the timpous and Bogue piver vallers. Now, this was rather tantalizing, to ask one to a feasiwhep he is chained to a post. We did not get the news of the meeting till Wednesday evening, and to be in attendance on Priday we would have to take the cars. Thursday more would have to take the cars Thursday morn-

appeared by staturday apper, elected ate officers, and, after listening to the address of the president, adjourned. The address was no doubt eloquent and full of good advice to the association. He cited the association to California, and printed out the great advantages of organization, referre to the vast amount of capital invested, etc., but who are to be benefited here by ft. Why, a few in and near Portland, that is all and the Portlanders are to read in the main a monopoly of the fruit trade, as the violet forming the tipartite alliance, viz the Oregon & Calliornia. Raitront company, the Stribert Paulic Raitront company and the Fruit crivewer's association.

Now, I am not a choid creaker. This is my first and call company not taking all hugginito consideration, it is prima facte evident than Portland is the all-in all of the association. The Nortland is the all-in all of the association. The Nortland is the all-in all of the association. The Nortland is the all-in all of the association. The Nortland is the all-in all of the association. The Nortland is the all-in all of the association.
